Robert Morris

DATA & BUSINESS ANALYTICS | AUTOMATION | PRODUCT ENABLEMENT | RISK MANAGEMENT

Buffalo, NY | 585-205-6387 | RobMorris9@gmail.com

Analytics and automation leader with 14+ years across banking risk, treasury, and operations. Builds behavioral risk models, Python-driven workflows, cloud-based data products, and executive dashboards that translate complex portfolio data into strategic decisions. Partners across sales, underwriting, product, and compliance and has led teams of 10+.

EXPERIENCE

KeyBank | Business Banking Analytics

Vice President • Buffalo, NY 2025–Present

- Own and enhance a behavioral risk model that triggers credit line freezes and downgrades, identifying ~$40M in exposure and mitigating ~$6M in expected losses before full drawdown, with a path to reinstatement as client behavior improves.
- Designed a credit-risk scoring methodology and Tableau dashboard used by ~300 salespeople to monitor risk signals, assess portfolio exposure, and inform compensation decisions.
- Led the end-to-end product lifecycle for the behavioral risk model and dashboard, including development, UAT, launch, user feedback, and roadmap development.
- Developed small-business lending strategies to reduce charge-offs, including revolving-line-to-term-loan conversions, credit line increases, and high-risk industry reviews.
- Automated monthly adverse-action notifications, reducing processing time from ~80 hours to ~2 hours and resolving audit findings through process redesign.
- Redesigned monthly asset-quality reporting using Python and a Google Cloud data mart, replacing multi-day manual preparation with scheduled reporting, automated commentary generation, and direct delivery to leadership.
- Built Python-based Reg B monitoring workflows for verbal credit decision notices, reducing weekly analyst effort from ~5 hours to ~20 minutes and surfacing exceptions daily.

Citibank | Treasury, Product Control, and Foreign Exchange

Vice President • Buffalo, NY 2012–2025

- Treasury Risk Solutions, VP (2024-2025): Served as Chief of Staff while automating broker-dealer and international-entity CCAR forecasting and training employees on agent-based workflows.
- Liquidity Forecasting, VP (2021-2024): Owned Citigroup's weekly LCR forecasting model across planning, CCAR, and outlook cycles; supported optimization of ~$10B in balance-sheet resources and retention of ~$5B in U.S. entities during the 2023 regional banking crisis.
- Equity Derivatives Product Control, AVP (2019-2021): Led a six-person team responsible for daily P&L reporting and financial controls; built reporting solutions in Power BI, KNIME, and MicroStrategy.
- Foreign Exchange Trade Processing, Analyst to AVP (2012-2019): Managed 10+ staff supporting 1,000+ clients and ~$1B in daily settlements; delivered $29M in annual savings through migration to direct SWIFT messaging.
