FUNCTION
Portfolio Management

EMPLOYER
KeyBank

PRIOR
Citibank · 13 yrs

FOCUS
Risk · Treasury · Analytics

LOCATION
Buffalo, NY

Thirteen years at **Citi** means thirteen years of doing the work most people never see: building the infrastructure that keeps billion-dollar operations moving. From navigating international liquidity crises to executing balance sheet optimization initiatives that recovered $10B in positioning, the pieces fit together because someone made sure they did. And that someone is me, Robert Morris. Pleased to meet you.

At **KeyBank**, that same lens applies to portfolio management: finding the gaps, building predictive risk models, and ensuring the right people have the right information at the right time. At the intersection of business and analytics, the role is translating between the people who make decisions and the data that must inform them.

> **The kind of hire most leadership teams spend a quarter defining and a decade trying to keep.**

2012 — 2024

LEADERSHIP & CULTURE

01 Citi Buffalo Pride
Co-founded the employee resource group, now 300+ members strong.

02 AI Accelerator
Early adopter and advocate for integrating generative AI into banking workflows.

03 25+ Workshops
Facilitated cross-functional productivity workshops across Citi Buffalo operations.

04 Site Ambassador
Represented Citi's Buffalo campus, bridging local teams with enterprise leadership.

EXPERIENCE

Portfolio Management
2025 – Present

KEYBANK

Managing risk strategy, automation, and systems design across the business banking portfolio. Built predictive models to proactively close or reduce credit lines before high-risk customers reach max utilization, actively mitigating millions in daily exposure.

Risk Strategy · Predictive Modeling · Salesforce · Portfolio Analytics

VP, Non-Trading Market Risk Solutions
2024

CITIBANK

Operated as Chief of Staff, driving cross-functional coordination across Treasury, Finance, Risk, and Tech. Spearheaded the Treasury Management Notebook in Confluence, was among the first in the division to operationalize generative AI in live banking workflows, and automated cash rebalancing in forecasting platforms.

Treasury · GenAI · CCAR · Confluence · Cross-Functional

VP, Liquidity Management
2021

CITIBANK

Key player in Citi's banking crisis response. Executed massive balance sheet optimization initiatives that improved liquidity capture across targeted sub-entities, successfully optimizing regulatory ratios and cementing $10B in improved liquidity positioning.

LCR / NSFR · Balance Sheet Optimization · Tableau · CCAR / 2052a

AVP, FX Processing & Equity Derivatives
2012–2019

CITIBANK

Led two high-throughput functions across Citibank Buffalo. In FX Trade Processing, managed Interbank and Corporate settlements teams (25 staff) through high-value global flows, driving a SWIFT migration that eliminated manual mapping layers and delivered $29M in annual savings. In Equity Derivatives Product Control, managed daily P&L for complex index and sector trades, overseeing a team of 6 through COVID-19 volatility, with dashboards built in PowerBI and KNIME for proactive risk identification.
